WHAT THIS VERIFIES

UPI and Card are enabled if and only if `VITE_RAZORPAY_KEY_ID` is present in the build. This is what makes going live a matter of setting an environment variable and redeploying, with no code change — and what stops the store offering a payment method it cannot actually take.

REPRODUCE MANUALLY

1. Build the app with VITE_RAZORPAY_KEY_ID set (any non-empty value) and serve it.
2. Sign in, add an item to the bag, and open `#/checkout`.
3. Step 3 "Payment Method": UPI and Card are selectable, subtitled with the method rather than "Coming soon".
4. Rebuild WITHOUT the variable: both revert to disabled "Coming soon", and Cash on Delivery remains the only option.
