

Admin workflow · Legal registration validation

Tresor Couture · automated end-to-end test report

Area	Admin console · Compliance
Test id	admin-w5-compliance-validation
Result	PASSED
Duration	15.7s
Executed	2026-07-27T17:47:41.451Z
Environment	Firebase Emulator Suite (Auth + Firestore) loading the production firestore.rules

WHAT THIS VERIFIES

The compliance screen validates PAN and GSTIN format, detects leftover placeholders, and cross-checks that the GSTIN embeds the PAN and carries the right state code — so a typo is caught here rather than on a customer tax invoice.

REPRODUCE MANUALLY

1. Sign in as admin@test.local and open #/admin/compliance.
2. Review the "Registered business" panel and the compliance checklist.
3. With no VITE_GSTIN/VITE_PAN set (as in this emulator build), the checklist must report them as placeholders rather than passing.

Legal registration incomplete — see the checklist. These come from

VITE_LEGAL_NAME / VITE_GSTIN / VITE_PAN in the deployment environment (never committed to source and a rebuild is required after changing them).

Compliance checklist

PAN configured

Placeholder PAN — set VITE_PAN in the deployment environment.

GSTIN configured

Placeholder GSTIN — set VITE_GSTIN in the deployment environment.

Registered legal name set

Still the default — set VITE_LEGAL_NAME to the registered entity name.

Registered place of business set

Still the placeholder address — set VITE_BUSINESS_ADDRESS (pipe-separated lines). It is printed on every GST invoice.

Data subject requests (DPDP)

Process access (export) and erasure requests per customer. Erasure anonymises personal details on past orders while retaining the financial record

3 ✓ Unset registrations are flagged as placeholders

The screen refuses to report an unconfigured GSTIN/PAN as valid — this is the guard that keeps a fabricated tax number off invoices.
