WHAT THIS VERIFIES

An admin can change a product's stock level from the Inventory screen and the new value persists. Stock is what /api/orders/place decrements, so this is the control that prevents overselling.

REPRODUCE MANUALLY

1. Sign in as admin@test.local and open #/admin/inventory.
2. Locate any product row.
3. Use the "Increase stock" control.
4. Confirm the displayed stock value increments and survives a reload.
