

Admin ↔ Customer · Concurrent real-time chat

Tresor Couture · automated end-to-end test report

Area	Cross-role · Support
Test id	admin-w6-realtime-chat
Result	PASSED
Duration	20.5s
Executed	2026-08-10T09:00:52.156Z
Environment	Firebase Emulator Suite (Auth + Firestore) loading the production firestore.rules

WHAT THIS VERIFIES

A customer and an admin, signed in simultaneously in separate browser sessions, exchange messages on a specific order and each sees the other's message live with no reload. This is the concurrency case: two roles operating in parallel against the same document.

REPRODUCE MANUALLY

1. Open two browser sessions. Sign in as customer@test.local in one, admin@test.local in the other.
2. Customer: #/account/orders → Chat on an order → send a message.
3. Admin: #/admin/support → open that conversation → the message is already there.
4. Admin: reply. The customer sees it without reloading.

STEPS (6)
